

Dear State Chairs:

It has been brought to my attention that not all coaches and judges are aware that as per Rules and Policies pg. #76 the vaulting safety zone **MUST** be placed snugly against the board so that there is no space between the zone and the board. Even when used for forward vaults or Tsuks.

Please forward this message to all appropriate individuals in your state and post on your web sites as you see fit.

Thank you,

Julie Bowse RTCC
